Actual participant number: 30 participants Intellectual Outputs Covered: OER platform

Activity Leading Organisation: EA

Participating Organisations: BEFO, ISQ, BEST

In June 2017 we organized a multiplier event – three workshops with the theme of implementation of entrepreneurship education on the EQF level 3. We discussed entrepreneurship education on the EQF level 3 and providing an attractive and attainable role model to learners. Our aim is opening up education and training to the wider world by offering attractive opportunities to business.

These events were organised by Educational Association and hosted by VET schools in South Bohemia. We decided to host smaller events selecting carefully the participants in order to have people really interested in the topic and able to bring the results of the project and the new training courses. In order to receive a perspective of the VET teachers and trainers on quality of those intellectual outputs - 3 workshops took place. Each workshop was connected with the entrepreneurial theme – how to attract and retain the right talents, how to create a dynamic millennial culture, encourage internal innovation, etc.).

The aims of those workshops have been to involve VET teachers and trainers interested at entrepreneurial education and share the project intellectual output, to explore new cooperation fields among the participants. The three meetings have been carried out in an interactive way for facilitating collaborative dialogue and the sharing of knowledge and ideas to create a living network of conversation and action in the area of entrepreneurial education.

An introduction to the topic was given by representatives of Educational Association who have presented a project, together with its objectives, main activities and results. The state of play report of each country and OER portal were introduced. The target group was introduced also with the structure of the training course for teachers and trainers. The aim was to facilitate possibilities of the entrepreneurial education to target group. Finally, the participants were particularly introduced to the OER platform that is tested and finalized and were invited to visit to this platform.

The presentations given led to fruitful reflections from the external participants, based on the experiences at entrepreneurial education. The event has received many positive feedbacks, people had a chance to share best practices and experiences with others.

Summary of the evaluation questionnaires

Success rate of the Multiplier event - overall rating of the event is very good. 87 % of the participants rated the event as very successful and 13% respondents as successful. No one gave a rating worse than 4 (= successful). About the satisfaction regarding the venue and the

quality of seeing and hearing of the presentations, where respondents could choose between "yes" and "no", all participants answered with "yes". 73% of the respondents said that they were very well informed about the objective of the event. The remaining 27% agreed that they were well informed. Regarding how the event met the expectations, 80% rated with highest score and 20% with good score. 66% respondents rated the job relevancy with the highest score. 34% agreed that the content is relevant to their jobs. For 93% of the respondents were the event objectives very clear and for 7% clear. No one was unclear about the objectives. Three quarter of the participants were strongly agree with the statement that the activities gave them sufficient practice and feedback. One quarter agreed on the same. The satisfaction with the facilitator was exceptionally high among all evaluation topics. 87% participants were very much satisfied with the facilitator, the remaining two participants were satisfied with the stand of preparation. All participants agreed that the facilitator was helpful, 81% even strongly agreed with this statement. Also the clearness of the intellectual output's objectives was highly rated with 87% giving the highest score and the rest giving the second highest score. The evaluation of the practical usage shows similarly high scores. 81 % strongly agreed and 19% agreed with the statement that the activities gave them sufficient practice and feedback to IO. All participants rated the Multiplier event as successful, also when it came to the accomplishment of the IOs. Three quarter of the respondents gave the highest score, the remaining one quarter was also positive. 73% of all participants strongly agree that they will be able to use the learned topics in the practice, still the remaining 27% agree to that.
